June 2015	110	0	18119

There were 11 surveillance inspections conducted at 6 different sites for a total of 110 fish sampled this month. Samples are targeted to moribund and fresh mortalities when possible. All sites were scheduled for monthly or bimonthly sampling. Routine harvest of market-size fish and stocking of smolts continued. The water temperatures continued to increase in response to the warm air temperatures. There were no cages confirmed this month. All sites with fish in the water were Category 1 as of the end of the month; except for one site which was Category 2 due to a single suspect case which is under investigation.
